Hardware Connection Guide

- Plug the USB connector into a USB port on the computer.
- The operating system will auto detect the device and make necessary installation.
- Windows 98 requires a device driver, which can be downloaded from www.digitex-europe.com. Please install the driver before plugging in your device.

Security password function

For security password function, download a special utility from www.digitex-europe.com. This programme will help you to divide the USB flash drive into 2 parts, access to one of them could be protected by the password.

Attention:

- Do not unplug the USB flash drive if the LED indicator is flashing. This means that the USB flash drive is reading or writing information and unplugging the device could damage the information or USB flash drive.
- Please do not leave the USB flash drive in direct sunlight for extended periods or leave close to electronics which are running with high current.
- This product should only be disassembled or repaired by authorized personnel. Please contact the retailer in case assistance is required.
- If you have any further questions related to the installation of this product you may contact us via e-mail on info@digitex-europe.com.
